

## FLIGHTMAP 7.11 Release

FLIGHTMAP 7.11 is the next minor release of FLIGHTMAP. It focuses on chart building and version management.

Feature	Description
<b>Improved styling of charts</b>	Improvements are made to the styling of the charts, resulting in a more refined, up to date look and feel of the bubble, balance and timeline chart.

### Version list

The already sophisticated version management within Flightmap is extended with a version list, to easily compare multiple versions of the same project. Moreover, versions can now easily be identified via a default property, for example the stage in which the project was when the version was originally created.
