

The major change in Flightmap 11.2 are the renewed data pages.

Data pages

The data pages have been rebuilt. Some actions do not require a complete refresh anymore.

The image shows a side-by-side comparison of the 'Algeas UM' project data page in Flightmap 11.2. The left panel represents the 'Read Only' state, while the right panel represents the 'Editable' state.

Left Panel (Read Only):

- Project: Algeas UM
- Current version: Current version
- Read Only: ☐
- Base Plan (Default) Plan (Improved timing) Actual Access rights Documents Change overview
- Project Name: Algeas UM
- Project Id: 001
- Project color: ■
- Portfolio: CleanTech
- Group: Europe
- Wave: Flux upgrade
- Dependency: -
- Project owner: Paul Evers (Bicore)
- Description: Powering cars with algae: The current research builds off of a U.S. that ran from 1978-1996. Through the National Renewable Energy Laboratory (NREL), the 18-year-long 'Aquatic Species Program' focused on high-oil algae cultivation for biodiesel. At the time the program was canceled, algae was competing against low oil prices. However, surging prices and advances in biotech over the biocrude race. LiveFuels aims to infuse U processes to increase algae oil production.
- Tags: Energy, algae, biotech, biodiesel

Right Panel (Editable):

- Project: Algeas UM
- Current version: Current version
- Editable: ☒
- Base Plan (Default) Plan (Improved timing) Actual Access rights Documents Change overview
- Project Name: Algeas UM
- Project Id: 001
- Project color: ■
- Portfolio: CleanTech
- Group: Europe
- Wave: Flux upgrade
- Dependency: -
- Project owner: Paul Evers (Bicore)
- Description: Powering cars with algae: The current research builds off of a U.S. Department of Energy funded study that ran from 1978-1996. Through the National Renewable Energy Laboratory (NREL), the 18-year-long 'Aquatic Species Program' focused on high-oil algae cultivation for biodiesel. At the time the program was canceled, algae was competing against low oil prices. However, surging prices and advances in biotech over the biocrude race. LiveFuels aims to infuse U processes to increase algae oil production.

New data page

Other improvements

The entity selections (e.g. Projects, Portfolios) in the datapages, charts and lists have been renewed. They support search when more than ten items are in the list.
